PATENT PENDING

Don't let your bananas turn brown and mushy before you have a chance to eat them! Hanging bananas helps dissipate a natural gas they emit that hastens the ripening process & speeds spoiling. Our hanger keeps bananas fresher longer & limits soft spots and bruising by allowing circulating air to ripen bananas as nature intended.

Our hanger compliments any type of décor & is a great addition to your housewares line:

- Holds twice the number of bananas as other hangers
- Hang single bananas using the patented hook system
- No tools required for assembly
- Packaging takes up minimal shelf space
- ABS plastic with metallic finish
- Merchandise with bananas or other kitchen items

Our packaging educates the consumer on WHY she should hang her bananas!

Assembled product measures 6" x 6" x 14"h

Full-color packaging measures 8" x 10" x 1-1/2"d (includes hanger)

Holds single bananas, too!

Easy to Assemble

1
Insert neck into base

2
Insert head on neck

3
Add bananas!
